Butterflies & Moths - species seen in Selsdon Wood

We have a booklet entitled "*Selsdon Wood Nature Reserve - Its history and Management: Some records of Flora and Fauna"* which was produced in 1978 by Jack Penry-Jones on behalf of the Croydon Natural History and Scientific Society. This contains a list of “Macro-lepidoptera” (butterflies and moths)” recorded by E H Wild prior to publication in 1978. These are indicated by a Y in the 1978 column but Mr. Wild’s list includes around 200 more species (mostly moths) than we have seen and shown on this chart.

The dates in the other columns show first sightings in any one year. Dates in 2012 are drawn from Ted Forsyth’s transects and other dates prior to 2018 are drawn from website photographs. In 2018, moths seen on 11th July were caught on the test of the new moth trap and those on 19th July during the Bat & Moth Walk.

Species are listed in the same order as they are shown on the FSW website. Only the English names are given here (except in the few cases of moths with no English name) although the Latin names are given on the website. Red text shows species (or varieties) seen for the first time this year.

From 2022 the initials of the person making the sighting are given - Valerie Baldry (VB), Daniel Bound (DB), Steve Budd (SB), Ruth Budd (RB), Connor Church (CC), Enma Darei (ED), Chris Green (CG), Tony Flecchia (TFI), Rosalyn Heaton (RH), Frank Kippin (FK), Annette Lawrence (AL), Lauren LeMasurier (LL), Stefan Morris (SM), Lucina Offer (LO), Alison Wanless ((AW), and Nicola Webster (NW). Daniel’s sightings were made on his weekly transect (but not photographed), the two 2023 sightings marked * were seen on the annual Butterfly Walk on 8th July and the 2024 sightings marked * were seen on the Butterfly Walk on 29th June 2025. Butterflies sighted on the Butterfly Walk are coloured green – all but one of these (the Gatekeeper) had been seen previously as the date and initial notes.
