

FSW Green & White GAZEBO (Pentagon Shape)

Instructions

Start with 5 pronged centre piece

Insert pole number 1 into each of the five prongs

Insert pole number 2 into pole 1

Lay on ground

Connect Pole(s) 3 to Pole(s) 4 and lay out on ground horizontally to the end of Pole(s) 2

Take 4 pronged connectors

Insert Pole number 2

Insert Pole number 3

Insert Pole number 4

Now comes the tricky bit

Standing in the middle of the plot, hold the 5 pronged centre piece to try to make sure that the poles do not come adrift. Place a chair nearby

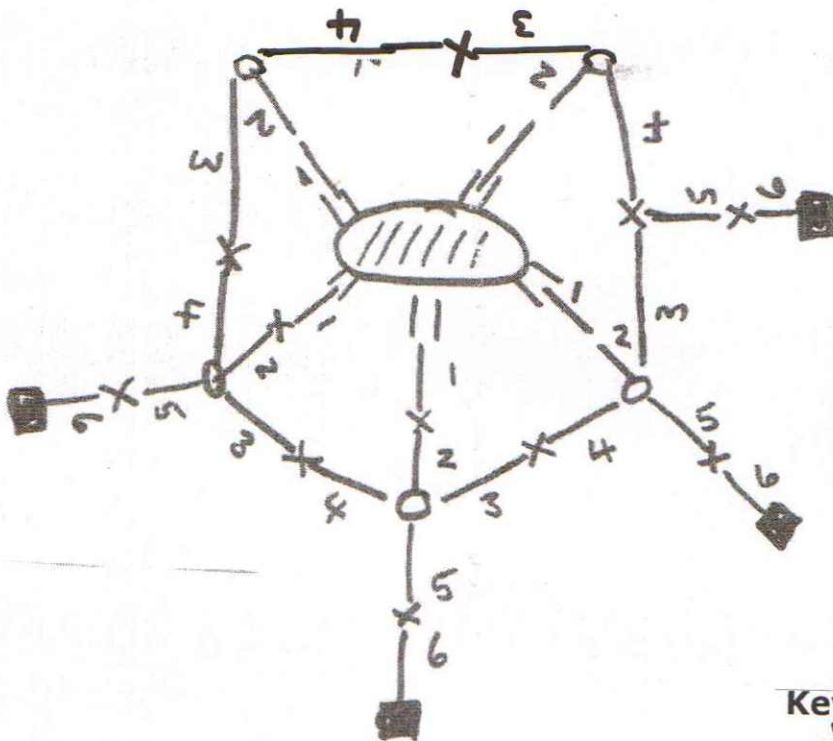

Carefully insert Pole number 5 into the remaining hole in the 4 pronged connector

Now place the cover over the gazebo frame.

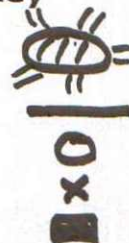

Person in the middle now needs to gently raise the 5 pronged centre piece, and will probably need to stand on a chair.

Place the feet onto the thicker end of Pole(s) number 6

now carefully connect Pole(s) number 6 into Pole(s) number 5

Key

- = Five pronge centre piece
- = Poles
- = 4 Pronged connectors
- = Connect Pole to Pole
- = Feet
