

Trees and Shrubs - species seen in Selsdon Wood

We have a booklet entitled "*Selsdon Wood Nature Reserve - Its history and Management: Some records of Flora and Fauna*" which was produced in 1978 by Jack Penry-Jones on behalf of the Croydon Natural History and Scientific Society. This contains a list of "Flowering Plants and Ferns (including trees, shrubs, grasses and sedges)" Recorded by Raymond Clarke of the CNHS prior to publication in 1978. These FSW species lists subdivide the collection into four separate lists: Trees; Wild Flowers; Grasses; and Non Flowering Plants.

This list of Trees is listed in alphabetical order of common name. There are 41 species currently found within Selsdon Wood. (Bullace was previously thought to be Blackthorn and was only correctly identified in 2015 and Wild Service were first introduced in 2011.)

The "Where" column gives an indication of the general location or distribution - or a specific location where appropriate.

Species with records in the Penry-Jones booklet recorded with a tick in the 1978 column. Those not currently found within Selsdon Wood are listed in red. In 2016 we started to record the first sighting of leaf (l), flower (f) or fruit (named) on tree species. **2023 records in red are not all first sightings but make a record of how many different species of tree are bearing fruit in our wood this year.**
