

## Wild Flowers - species seen in Selsdon Wood

This list of Wild Flowers is listed in alphabetical order of common name. The "Flowering" column shows the months in which the plant is normally in flower and the "Where" column gives an indication of the type of location if the flower is widespread - or a specific location where appropriate. There are 161 species that have been seen in recent years (and photographed) and a further 23 species that have been observed but never photographed in Selsdon Wood. These highlighted with a pink row. If you can find any of them and send us a photograph we would love to hear from you.

We have a booklet entitled "*Selsdon Wood Nature Reserve - Its history and Management: Some records of Flora and Fauna*" which was produced in 1978 by Jack Penry-Jones on behalf of the Croydon Natural History and Scientific Society. This contains a list of "Flowering Plants and Ferns (including trees, shrubs, grasses and sedges)" Recorded by Raymond Clarke of the CNHS prior to publication in 1978. These FSW species lists subdivide the collection into four separate lists: Trees; Wild Flowers; Grasses; and Non Flowering Plants. Species with records in the Penry-Jones booklet are recorded with a tick in the 1978 column.

Observations began in 2010 but were sporadic until 2012. Any sightings or photographs between 1978 and 2012 are recorded in the 'int' column. The letter P indicates that there is a photograph on the FSW website and the month it was taken. A red highlight shows that this is a species newly observed this year. The full date is in photo caption on the website. For observations without photographs (made and recorded in the course of guided walks) just a tick is recorded. In 2014 we started to record the first sightings of seasonal flowers. This is phenology - the recording and study of recurring events in nature - which allows comparisons between years. Long term records can provide an early warning system to alert us to the potential problems of climate change. No clear and obvious trends are yet apparent in our data. However, what appeared to be the leaves of a Bluebell were spotted in Steven's Larch on 2<sup>nd</sup> January 2024 after a very mild December. This is a good month earlier than any previous Bluebell leaf sightings.

Dates for 2020 may be late as coronavirus shutdown meant that regular walkers were not getting out to spot flowers as they first appeared. In 2021 the relative safety of outdoor recreation meant that many spotters were active in the wood and the data is thus more reliable.

Sightings by Valerie Baldry (VB), Ruth Budd (RB), Luci Collings (LC), Gillian Draper (GD), Helen Douglas (HD), Kay Ellis (KE), Tony Flecchia (TFI), Ted Forsyth (TFo), Karen Fox (KF), Heather Govier (HG), Karen Hall (KH), Rosalyn Heaton (RH), Lisa Millard (LM), Terri McNally (TM), Frank Oko (FO), Janet Pierpoint (JP), Bernadette Wakefield (BW), Jo Wheeler (JW)

Yellow Bird's Nest		Broad Walk										16 Jan	5July				

- In 2016 Ted Forsyth did a count of Early Purple Orchids. In the Beech Grove group there were at least 76 in flower, including several on the edge of the path between Broad Walk and Vale Border. At Courtwood Grove there were 23 to the right of the entrance path and 24 well-scattered to the left of the path. Brian Pitkin found a third colony of Early Purple Orchids (c. 30 plants at TQ3664262180) is north of and not far from the other two.
- 2016 was also a good year for Herb Paris. Brian Pitkin reported "Thanks to David's directions I found the second colony of Herb Paris (c. 80 plants at TQ3643862317), opposite the colony by The Bridle Way fence (c. 60 plants at TQ364462322) at the site that Heather showed me in early April. The former was about 8 metres into the Brookscroft Woodlands). I also located a third and larger colony of Herb Paris (c. 100 plants at TQ3667062150) north of the, now three, colonies of Early Purple Orchid. This larger colony of Herb Paris is most easily located if you follow the small path from the extreme NE of Selsdon Wood NR towards the Early Purple Orchids. When you reach the three very large Yew trees without understorey, the Herb Paris are north of the path in the woodland.
